EDUCATION

Sardar Vallabhbhai National Institute of Technology

Integrated MSc Mathematics

Surat, India

Aug. 2024 – May 2029

EXPERIENCE

Open Source Developer – Joomla Academy

May 2026 – Aug 2026

Joomla!

Remote

- Designed Ajaxified administrator workflows for Joomla list actions including filtering, publishing, and state transitions by bypassing the traditional POST-Redirect-GET cycle for asynchronous requests while preserving existing MVC execution flow and permission checks
- Implemented partial-response rendering strategies to update administrator list containers without full document regeneration, maintaining compatibility with Joomla models, plugins, and extension ecosystems
- Architected an autosave persistence mechanism independent of Joomla's primary content save pipeline to preserve editing progress without triggering plugin execution or excessive version history creation
- Implemented version-aware draft synchronization strategies, timed background persistence, and lightweight state recovery workflows for reliable administrator-side editing experiences
- Extended Joomla administrator filtering capabilities through custom field-aware query integration using subquery-based filtering approaches within `getListQuery()` while avoiding duplicate row generation

PROJECTS

Webhooks Integration in Joomla! | *PHP, AJAX, GitHub Workflows*

- Analyzed and tested Joomla webhook integration workflows involving AJAX request handling, controller execution flow, payload validation, routing behavior, and asynchronous backend processing
- Reproduced and debugged edge-case failures in webhook verification pipelines, contributed fixes through pull requests, and participated in patch testing and GitHub-based review workflows
- Investigated backend request lifecycle behavior and controller interactions to improve robustness and maintainability across webhook processing systems

StepUpNow | *Next.js, MongoDB, Node.js, Tailwind CSS, Firebase*

- Built a full-stack mentorship platform with authentication, mentor booking workflows, payment integration, and administrator dashboards
- Implemented recurring mentor slot booking systems, Razorpay payment verification, Firebase OTP authentication, and review management workflows
- Designed scalable backend models and REST API workflows for session handling, recurring bookings, and user management using MongoDB and Mongoose

Ambe Glass Works | *Next.js, Tailwind CSS, JavaScript*

- Developed and deployed an SEO-optimized business website with responsive layouts and lead generation integrations
- Integrated Google Maps, WhatsApp workflows, and custom inquiry forms for customer engagement

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP, Python, C/C++, SQL

Frameworks: React.js, Next.js, Node.js, Express.js, Tailwind CSS, PostgreSQL, MongoDB

Developer Tools: Git, GitHub, Docker, Postman, Bruno, Laragon, Vercel, Railway

POR & EXTRA CURRICULARS

Executive Member – ACM SVNIT & CEV SVNIT

2025 – Present

SVNIT Surat

Surat, India

- Contributed to technical initiatives, collaborative programming activities, and developer-focused events within SVNIT's computing community
- Participated in organizing technical events, community-driven initiatives, and student-led engineering activities across the institute
